DSAIM Virtual Research Laboratory (VRL)

Laboratory Rules

1. VRL is a unique professional modeling environment from world leading industries and very different from many similar laboratories. Please work and behave accordingly

2. The VRL laboratory system consists of own platform in the 3DEXPERIENCE platform operated by the Dassault Systémes S. A. in its cloud and the V6 PLM modeling system which is operated on-premise by the Óbuda University. Any activity which changes the accessibility or availability of these software units including modification of settings, unallowed downloads, open any other software.

3. Reactive procedures with many automatic contexts are operated in this level of laboratory activities. To proper progress at laboratory work, follow instruction of the person who supervises activity and do not use APPs or activities other than supervisor asked.

4. Turn computer and software on or off only when it is asked by the supervisor.

5. When it is unavoidable, ask permission to use own laptop.

6. Any activity against cybersecurity is forbidden.

7. Going on any Website that not asked is not allowed.

8 No food and drinks in laboratory except for which is needed to sustain personal hydration.

9. Downloads are forbidden except for which asked or permitted by the supervisor.

10. Log off and switch off workstation before leaving the laboratory!

László Horváth

Leader of the VRL
