

Decisions of the Council of the Doctoral School of Applied Informatics and Applied Mathematics

Decision No. 220

Resolution No. 220/1: PhD student Boróka Olteán-Péter has submitted a request to the doctoral school, asking to be granted passive status for the Spring Semester of the 2025/2026 academic year. Although this would be her third passive semester, the first two were justified by the birth of her child, and the regulations allow this*, therefore the Council of the Doctoral School of Applied Informatics and Applied Mathematics approves the request.

* In the doctoral degree acquisition procedure, the suspension of the student status (passive status) may not exceed two semesters, or, in the case of the doctoral student's childbirth and as specified in the doctoral regulations, may not exceed six semesters.

Resolution No. 220/2: PhD student Mohammad Amin Rezaei has submitted a request to the doctoral school to change his supervisor, asking that Dr. Amir Mosavi to be appointed as his sole supervisor. The request has been approved by both of his current supervisors, Prof. Dr. Imre Felde and Dr. Amir Mosavi. The Council of the Doctoral School of Applied Informatics and Applied Mathematics approves the request.

Resolution No. 220/3: The Operational Regulations of the Doctoral School of Applied Informatics and Applied Mathematics have been reviewed and brought into alignment with the provisions of the Obuda University Doctoral and Habilitation Regulations effective as of 1 January 2026, as well as with the considerations arising from the previous findings of the Hungarian Accreditation Committee (MAB). The Council of the Doctoral School of Applied Informatics and Applied Mathematics approves the new Operational Regulations.

Budapest, 23 March 2026

Dr. Gyula Simon
Professor
Chair of the Council of the Doctoral School
